

Vacancy

Position: Junior Geospatial Technician

Are you looking for an exciting opportunity to start or develop a career with one of the leading companies in the rapidly expanding geospatial sector?

Geospatial data is a key enabler of the technological revolution. As one of the leading providers of global geospatial data, and with more than 20 years' experience in this dynamic industry, Getmapping is at the forefront of helping organisations to unlock the power of geospatial data across their organisation, providing high quality business intelligence and easy access to the right geospatial data for individual business requirements.

Want to be part of our exciting journey?

We are looking for a junior Geospatial Technician to join our growing Mobile Mapping (MM) team.

Previous geospatial experience is not required, but we are looking for bags of enthusiasm, a positive can-do attitude and the flexibility to travel as you support field-based capture programs across the UK and Europe. The role will also involve office-based post-processing work, so an interest and aptitude for IT are desirable. No previous geospatial experience required. Training will be provided.

Qualifications:

- Minimum A Level or equivalent.
- Degree in IT, Technology, surveying or Geomatics (preferred).

Essential Requirements:

- Full UK Driving Licence: Cat B.
- Basic IT skills.
- Good sense of direction/navigation and use of the car or phone GPS.
- Physical robustness to load, pack/unpack and mount/dismount surveying equipment on the roof of a vehicle.
- Availability to travel and stay away overnight as projects require.

Preferred Requirements (Not essential for new starters):

- Knowledge of the principles of geospatial data collection.
- Minimum 6 months experience in the Land or Aerial Surveying industry.
- Full understanding of land survey techniques, Global Navigation Satellite System (GNSS), digital imagery and Light Detection and Ranging (LiDAR) concepts.
- Experience surveying using a Total Station or a Real-Time Kinematic (RTK) – GNSS receiver

Working Locations:

We are located in brand new, modern offices in Fleet (Hampshire). Due to the nature of our business, you will also be required to work throughout both the UK and from time to time, Europe.

In these cases, you will be expected to stay away from home and accommodation and subsistence will be provided.

Working hours:

Fleet office operates from 9:00 AM to 17:00 from Monday to Friday.

Due the nature of this role, it is expected that the successful applicant may be working, when needed, up to 10/12 hours shifts when capturing data (including mobilisation).

Remuneration:

Salary and benefits include 25 days paid holiday plus bank & public holidays, a company bonus scheme and a company pension scheme.

This is an entry level, UK based role, and as such we are currently not able to provide sponsorship for overseas applicants seeking UK citizenship.

Reference ID: MM 2022

Expected start date: 01/06/2022

Job Types: Full-time, Temporary, Contract, New-Grad, Permanent

COVID-19 considerations: We have adopted safer travel guidelines for passengers who share a vehicle.

Getmapping is an Equal Opportunities Employer, and all recruitment will be based solely on merit.
